***Election/Restriction***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to a method for making a catalyst composition, classified in class 502, subclass 63+.
- II. Claims 10-24, drawn to an alkylation process, classified in class 585, subclass 400+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated for purposes of restriction. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to completely diverse processes that produce different products. Accordingly, they are unrelated.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

During a telephone conversation with Mr. Bergen on February 8, 2005 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-9. Affirmation of this election must be made by applicant in replying to this

Office action. Claims 10-24 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

### ***Specification***

The examiner has not checked the specification to the extent necessary to determine the presence of **all** possible minor errors (grammatical, typographical and idiomatic). Cooperation of the applicant(s) is requested in correcting any errors of which applicant(s) may become aware of in the specification, in the claims and in any future amendment(s) that applicant(s) may file.

Applicant(s) is also requested to complete the status of any copending applications referred to in the specification by their Attorney Docket Number or Application Serial Number, **if any**.

The status of the parent application(s) and/or any other application(s) cross-referenced to this application, **if any**, should be updated in a timely manner.

### ***Allowable Subject Matter***

Claims 1-9 are allowable over the prior art of record. The closest prior art would appear to be US 6,080,303 to Cao et al., which discloses phosphorus-treated zeolites

with alumina binders. However, There is no disclosure of the herein claimed method of modifying the zeolite, which requires the dissolution of alumina in a phosphorus-containing acid solution and treatment of the zeolite with this solution.

### ***Conclusion***

This application is in condition for allowance except for the following formal matters:

The presence of non-elected claims 10-24. If the non-elected claims are cancelled, the application could be passed to issue.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
